

We're Looking for A Part-Time Farm Crew Member!

About Pink Moon Farm:

Pink Moon Farm is a diversified 22 acre farm located in Eatonville, Washington. On Nisqually tribal land, we are in our fourth year of growing. The farm is run using sustainable, thoughtful practices—while not certified organic, the farm uses practices that align with organic certification and we combine animal and vegetable production to increase soil health.

In 2022, Pink Moon's production will include approximately 2 acres of mixed vegetables, a flock of laying hens, and Icelandic Sheep. We also have several high tunnels for hot crop and season extension practices.

Pink Moon sells a farmers market in Seattle, several wholesale accounts, and directly to consumers through a community supported agriculture program (CSA). We are committed to producing quality food, at an affordable cost, for our communities. Our farm is proudly LGBTQ owned and operated, and we follow COVID-19 safety protocols.

What We're Looking For

The ideal candidate will have some gardening or farming experience, but experience is not required. Most of the work will be in vegetable production—including: seeding, planting, weeding, harvesting, packing, and distributing produce to local markets.

Opportunities to learn and take on aspects of animal care will also be available. We are still in the process of completing perimeter fencing, and updating our irrigation system—there are typically opportunities to work on infrastructure projects throughout the season if interested.

What You'll Get

Alongside formal compensation, all employees have access to vegetables, and plant starts throughout the season. Being young farmers ourselves, we're happy to loan tools, provide support, and connect you with other farms. We're a tight-knit and fun crew—we love to work hard, blast music, and produce the best food we can.

Seasonal housing may be available, but will be negotiated separately from work compensation.

Expected Duties:

- Seed, weed, harvest, wash, and pack vegetables according to farm standards and practices
- Assist with setting up irrigation system and repair when necessary

- Wash and pack eggs
- Assist in feeding animals; including layers, and sheep when necessary
- Support with infrastructure and repair projects as needed
- Ideally support with Tacoma CSA pick up once every 3 weeks

Desired Skills:

- Strong attention to detail
- Ability to follow directions and communicate when unclear
- Excellent observation skills
- Able to work alone or with group
- Strong communication skills
- Willingness to learn farm standards and follow them

Expected Hours & Compensation:

The ideal start for this position is mid-April to first week of May and will end October 31, 2022. We would like someone to work 3 days/week, ideally on Wednesday, Thursday and Saturday.

Payment will be \$15/hr, with paydays twice per month. Performance bonuses will be assessed at the end of the season. There may be flexibility and/or opportunities for additional hours throughout the season. Paid sick leave is accrued at one hr for every forty hours worked. In addition, this position has four paid days off per season to be used at the employees discretion. We ask that folks schedule this at least 2 weeks in advance.

We're excited to hear from you. Please send a resume, and a short cover letter detailing any past farming or gardening experience, and why you are interested in working at Pink Moon. References will be requested after an interview.

Applications can be sent to pinkmoonfarmer@gmail.com and will be reviewed on a rolling basis until filled. For more information about us, visit our website: www.pinkmoonfarm.org.
